

Instructions

0. There are two octahedrons.

3. Fold along all creased lines.

4. Glue tabs to corresponding side
- the top four triangles and
the bottom four

10 May 2008 2:00:31am.

<http://www.peak.org/~jeremy/hexagons>

1.
Crease between
each triangle, and at base of tabs.
2. Cut each figure out around tabs.

4...
triangles
each form a pyramidal
cup. When dry, glue cups together
by the mouth to form the octahedron.

Octahedrons
