

Instructions

0. The figure is 12 connected pieces, as shown in the inset.
1. Crease along all the lines, (see right inset) including tabs.
2. Fold each crease line flat.
3. Cut figure out around tabs.
4. Cut between each piece, but don't cut the hinges, which are indicated in the inset.

5. Each of the 12 pieces folds into a pyramid. Practice folding into pyramid before gluing to corresponding position. Glue pyramids one (adjacent) pair at a time, to ensure that each hinge has complete flexibility.

6. The resultant bracelet of pyramids can be folded into many shapes.

Two bracelets

can form a cube.
